Transcript Considerations

In general, list the courses by subject matter, ie English then Math then History...see example.

Please try to remember how a college admissions officer or other public-school official would view these. Make your subject listing clear and feasible from the standpoint of what the public school official (or college admissions officer) is accustomed to seeing and needs for evaluation for public school placement or college.

Avoid "double listing" of subjects. Extensive courses of study *can* be more than one credit but the subject listing should not contain the same subject name twice. Some examples:

If the student earned four Bible credits, do not list each one as "Bible," but differentiate them in some way, i.e. Bible I, Bible II, Bible III or Old Testament Study, New Testament Study, Study of the Prophets.

For two Auto Mechanics courses, use some type of classification, i.e. Basic Auto Mechanics and Advanced Auto Mechanics.

U.S. History and American History should not be listed as two separate credits. This has sometimes happened when an extensive course of study was used. These should be differentiated in some way, i.e., American History through 1860, and American History 1860 through today; or American History and U.S. Government.

English credits -- vocabulary, grammar, literature, spelling -- are generally best combined to read English 9, English 10, English 11, English 12.

Math credits -- these must be described according to course content and the general description "Math" or "Math 9th grade" is not acceptable on a high school level.

Completing per the sample will allow you to tell at a glance which diploma program the student has completed.

Remember, these are *guidelines*, not hard and fast rules. If you have questions, please email us.
